MOT part two. The ugly truth is here for all to see and there are also some extra stats to back it all up. We are not messing around because the simple truth is that electricity cars are problematic when it comes to the test centre. Being Free Car Mag we have roped in the Jaguar Type 01 so we can have a pop at that for being basically a PP3 Battery on wheels. More seriously we reckon in three years time there will be trouble at the MOT mill.
See you next time...

Next Time

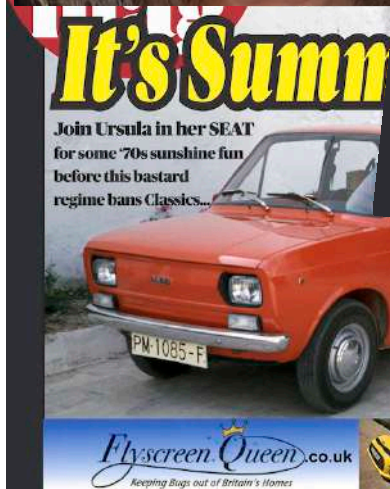

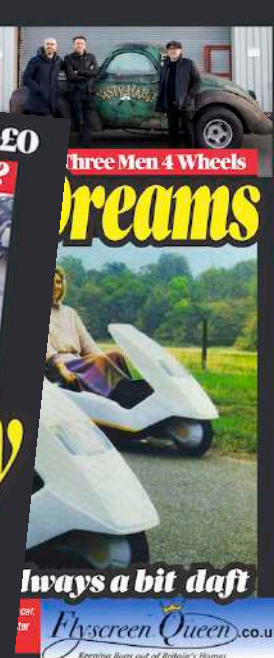

FCM 163

Free Car Mag continues the fight for motoring freedom, sticking up for drivers and those who want the freedom to choose what to drive and when to drive it. There will be stories that can't be read anywhere else and in 163 that means there is either an election or a terrible budget, or both.
