

- A1 - A15: - The climate is cooling, not warming - unless you falsify both the data & collection methods. A16- A19: Yes, trust the data, but only if the source can be validated as unbiased. A20: It's Alive! The Green Blob Is A Parasitic Organism - The Green Hive Mind. A21 - A42: Energy Realism: worldwide, there are NO high energy cost, high growth, high living standards economies. A43 - A58: Political backlash against Net Zero & other insane eco-policies is gaining ground in the developed world (including Michael Mann getting the good financial-legal kicking he thoroughly deserves). A59 - A73: Eco-PsyOps operations are being exposed & consequently collapsing. A74 - A80: Technology industries globally reverting to science & diverging from dogma.
- Electricity Bills Rising Because of Gas prices, but the impact of Renewables is larger. B2 B6: Milband Madness being ruthlessly ridiculed except: *"in the abodes of the guilty"*. B7 - B12: Science Fantasy Govt. PsyOps Net Zero supporting strategies now butt of similar opprobrium.
- B13, B14 - Net Zero inspired Scottish speed limit reduction proposals exposed as ideologically-motivated.
- B15 - 20: Journos & non-Chinese Auto Manufacturers waking up to the risk the ICEV phaseout poses to their continuing existence.

Narrative:

- Japanese researcher confirms Beck's hypothesis that 280 ppmv estimated pre-industrial atmospheric CO₂ concn. is demonstrably wrong & an underestimate.
- C2: The Global Battery Storage Backlash gathers even more momentum.
